

Cluster Sound Guard

Is an anti-recording device. It operates on the principle of ultrasonic wave suppression and is capable of interfering with devices that pick up sound or record via microphone. This product can interfere with recording devices within a horizontal range of 360°, a vertical range of 90°. Furthermore, the device can be networked with multiple slave units to increase the space coverage rate.

---Scenarios---

- Private conversations.
- In places such as interrogation rooms and law firms where illegal audio - recording for evidence - gathering may occur.
- Important business meetings and Temporary anti - recording meetings.

---FEATURES---

- It is capable of covering all kinds of microphones.
- Horizontal 360 - Degree Coverage
- Support for Networking with up to 15 Slave Units and High- Space Coverage

---Specification---

Interference Range	: up to 2.5m Horizontal 360° Vertical 90°
Dimensions	: 135mm x 135mm x 210mm
Weight	: 1620±10g
Battery Capacity	: 15000mAh
Consumption	: Less than 30 Watts
Working Time	: More than 4 hours
Interface	: Type-C
Operating Temperature	: -5°C to +55°C
Storage Temperature	: -20°C to +55°C
